

SUSHREE NADIMINTY

NYC, New York | sushreen1@gmail.com | 716-910-7704 | linkedin.com/in/sushreen | github.com/sushree-n | Portfolio

Education

University at Buffalo, The State University of New York

Masters of Science in Computer Science and Engineering, AI/ML Specialization

GPA: 3.79/4

Work Experience

New York Life Insurance — New York, NY

Jan 2026 – Present

Fullstack AI Engineer

- Architected and deployed an enterprise-grade semantic search platform on AWS Kendra + Bedrock, replacing a legacy Lucidworks lexical system; integrated 11 data source connectors with custom preprocessing, guardrails, autocomplete, spell-check, and trending queries — delivering an 800% improvement in search relevance and significantly reducing agent lookup time.
- Built an AI Overview feature that generates citation-backed summaries of the top 20 retrieved documents using RAG, enabling insurance agents to surface policy and product insights from natural-language queries instantly.
- Developed an authorization service in Go for the GuideMe agent platform, implementing Attribute-Based Access Control (ABAC) via OPA (Open Policy Agent) with feature toggles that allow administrators to gate/ungate application sections per user group.

Relate CX — Buffalo, New York (Remote)

May 2025 – Dec 2025

AI Engineer Intern

- Designed and deployed Retrieval-Augmented Generation (RAG) systems using FAISS vector databases and embeddings to classify 40K+ unstructured call records across 200+ enterprises.
- Built voice AI agents using Vapi and LiveKit with LangChain-based multi-agent orchestration, integrating Five9s telephony and multiple voice providers (ElevenLabs, Cartesia) to enable autonomous reasoning, external API/tool use, and real-time streaming pipelines with Redis.
- Deployed scalable pipelines on GCP Vertex AI including monitoring to ensure reliability, privacy, and compliance; drove up to \$50K/month in cost savings and mentored 2 interns on prompt engineering and agentic AI workflows.

M2P Fintech — Mumbai, India

Jan 2024 – July 2024

Software Developer

- Built full-stack distributed applications with Java Spring + Node.js/Express.js, serving 70+ financial institutions with customer onboarding, payments, and compliance workflows.

Quantiphi Analytics — Mumbai, India

July 2023 – Jan 2024

Platform Engineer Intern

- Designed cloud-native distributed systems on AWS (EKS, SageMaker, DynamoDB, API Gateway, S3) and GCP powering scalable ML workflows; automated CI/CD, monitoring, and debugging pipelines for high reliability and performance.

Academic & Hackathon Projects

Drug Discovery Using Deep Learning

Jan 2025 – May 2025

UB CSE Demo Days | PyTorch, GNN, BiGRU, Transformer, LLM, React, Flask

- Built a multimodal ML pipeline (GNN, BiGRU, Transformer, MLP) with $R^2 > 0.87$ across molecular datasets.
- Integrated DeepSeek V3 LLM into a full-stack app, auto-generating reports with prompt engineering, evaluation systems, and interpretability features for biomedical researchers.

Audio Adversarial Attacks and Defence

July 2022 – April 2023

Deep Learning, B.E. Major Project

- Developed an adversarial robustness system using CTC Loss + DeepSpeech ASR, generating and defending against targeted audio adversarial attacks; trained a six-layer neural network for transcription robustness.
- Published results in the *International Journal of Innovative Research in Technology* (Apr 2023); deployed interactive Flask demo with psychoacoustic masking (AMR/MP3).

Skills

Frontend: React, TypeScript, JavaScript, HTML/CSS, Tailwind, Framer Motion, Angular (familiar)

Backend: Go, Python (Flask, Django, FastAPI), Node.js/Express.js, Java Spring

AI/ML: LLMs (Gemini, HuggingFace, Mistral, DeepSeek), Agentic AI, LangChain, CrewAI, RAG, Embeddings, Vector Databases (FAISS, Pinecone), AWS Kendra, AWS Bedrock, Prompt Engineering, Transformers, NLP, CV, Adversarial ML

Cloud & DevOps: AWS, GCP (Vertex AI, GenAI SDK), Azure, Docker, CI/CD pipelines

Certifications

Microsoft Azure AI Engineer Associate (AI 102) (2025) | Microsoft Azure AI Fundamentals (AI 900) (2021) | Google Cloud Big Data and Machine Learning Fundamentals, Coursera (2023)
